01 About This Manual

This manual is a detailed operational guide for using the Feezo School Accounts / Finance module. It is intended for accounts staff and other authorized users who record fee collections, payments, salary, expenses, cash and bank activity, and review accounting reports.

The supplied Feezo specification identifies the main daily-use Cash Operations modules as Receive Payment, Make Payment, Fees, Salary, Day Book, and Bank Reconciliation. It identifies Ledger, Journal, Trial Balance, Profit & Loss, and Balance Sheet as the General Ledger accounting area.

Scope: This manual expands the supplied operating notes into step-by-step instructions. It does not assume screens, buttons, approval rules, or features that are not described in the source material.

02 Feezo Accounts at a Glance

Feezo Accounts is used to manage school financial activity from fee collection through accounting reports.

Area	Main purpose	Typical user action
Settings	Prepare the accounting environment	Set Campus, Academic Year, Fee Categories and Ledgers
Receive Payment	Record money received	Record student fee or other income
Receipt	Provide payment evidence	Generate, print or download receipt
Make Payment	Record money paid by the school	Record salary, expense or vendor payment
Day Book	Review daily cash activity	Check received and paid transactions
Bank Reconciliation	Match software records with bank statement	Match transactions and bring difference to zero
Ledger	Review one account in detail	Check opening, debit, credit and closing
Journal	Review double-entry accounting	Verify debit and credit entries
Trial Balance	Check accounting balance	Confirm total debit equals total credit
Profit & Loss	Review financial performance	Compare income and expenses
Balance Sheet	Review financial position	Review assets, liabilities and equity
Analytics	Review summarized movement	Review income, expenses and net movement

03 Before You Start: Required Settings

Accounts entries should not be started until the basic accounting setup is correct. The source workflow is: Branch/Campus → Academic Year → Fee Categories → Account/Ledger Setup.

Pre-use checklist

■	**Confirm the correct Campus / Branch.**
■	Confirm the correct Academic Year.
■	Create or verify all required Fee Categories.
■	Create or verify required Account Groups and Ledgers.
■	Check document numbering and prefixes.
■	Only after these checks should daily Receive Payment and Make Payment entries be recorded.

Why this matters: Incorrect setup can cause transactions and reports to appear under the wrong branch, academic year, income group, expense group, asset or liability.

04 Campus / Branch

Campus / Branch separates accounting activity when a school operates more than one branch. The supplied specification states that receipts, payments, expenses, ledgers and document numbers can be separated by branch.

Step-by-step

1.	**Open the Feezo Accounts / Finance area.**
2.	Look at the Campus / Branch selected in the header.
3.	Select the branch for which you are about to enter or review transactions.
4.	Before saving any entry, check the header again.
5.	Continue only when the selected branch is correct.

What can go wrong?

■	**Entering a transaction under the wrong campus can place the receipt, payment, expense or ledger activity in the wrong branch.**
■	Branch-specific document numbers may also become incorrect.

Control
Make checking the Campus / Branch the first step of every accounts session.

SCREENSHOT PLACEHOLDER

Campus / Branch selector

05 Academic Year

The Academic Year is used for fee collection and related reports, including Fee Reports, Receipts and General Ledger Reports.

Step-by-step

1.	**Check the Academic Year shown in the system.**
2.	Select the required academic year, for example 2026–2027.
3.	Confirm that it matches the period of the transaction or report you are working on.
4.	Only then proceed with fee or accounting work.

Example
If the intended transaction belongs to 2026–2027, do not leave an older academic year selected.

06 Fee Categories

Fee Categories define the different types of fees collected by the school. The supplied examples include Tuition Fee, Admission Fee, Exam Fee, Transport Fee, Lab Fee, Library Fee, Activity Fee and Other Fee.

Step-by-step: create / verify a Fee Category

1.	**Open the Fee Category setup.**
2.	Identify the fee type that needs to be used.
3.	If it already exists, verify the name and use the existing category.
4.	If it does not exist, create the category using the appropriate fee name.
5.	Save the category.
6.	Confirm that it is available when recording a Receive Payment.

Important
Fee Categories must be meaningful and consistent because they are later used to identify what the student payment is for.

07 Account Groups and Ledgers

A Ledger is the account statement for a particular income, expense, asset or liability. Examples in the source include Tuition Fee Income, Salary Expense, Cash, Bank, Salary Payable and Vendor Payable.

7.1 Choose the correct Account Group

Example ledger	Correct group
Tuition Fee Income	Income
Admission Fee Income	Income
Salary Expense	Expense
Electricity Expense	Expense
Cash	Asset
Bank	Asset
Salary Payable	Liability
Vendor Payable	Liability

7.2 Step-by-step: Create a Ledger

1.	Open Ledger / Account setup.
2.	Enter the Ledger Name.
3.	Select the correct Account Group.
4.	Enter any other required details available on the screen.
5.	Save the Ledger.
6.	Verify that the Ledger is available for the relevant transaction.

7.3 Ledger classification control

Do not create an expense under an Income group or an income under an Expense group. Incorrect grouping can affect Trial Balance, Profit & Loss and Balance Sheet presentation.

SCREENSHOT PLACEHOLDER

Account group and ledger setup

08 Document Numbers

Feezo can use automatic document numbers for Receipts, Payment Vouchers, Salary Slips and Journal Vouchers. Prefixes and number sequences can be configured, for example RC-00001 and PAY-00001.

Step-by-step

1.	**Open the document-number configuration.**
2.	Identify the document type.
3.	Set or verify the required prefix.
4.	Set or verify the number sequence.
5.	Save the configuration.
6.	Test the next generated document number before regular use.

Branch control
Where multiple branches exist, separate numbering by branch is recommended according to the supplied specification.

09 Receive Payment

Receive Payment is used whenever money is received by the school. The supplied workflow supports Student Fee, Other Income and External Payer transactions.

9.1 When to use Receive Payment

■	**Student fee collection**
■	Other income
■	External payer payment

9.2 Step-by-step

1.	**Go to Finance → Receive Payment.**
2.	Select the Class.
3.	Select the Student.
4.	Select the relevant Fee Category / Fee Line.
5.	Check the amount displayed or entered.
6.	Select the Payment Mode: Cash, Bank / UPI, or Both.
7.	Select the Paid Date.
8.	Enter the Paid Time.
9.	Review all details carefully.
10.	Save the payment.

9.3 After saving

After the payment is saved, a Receipt can be generated. The student's fee position is also updated so that the collected amount is reflected in the relevant fee status.

9.4 Final verification

■	**Correct Campus / Branch**
■	Correct Academic Year
■	Correct Student
■	Correct Fee Category
■	Correct Amount
■	Correct Payment Mode
■	Correct Paid Date and Time

Accounting effect
A typical ■5,000 Tuition Fee collection is represented as Debit → Cash / Bank ■5,000 and Credit → Tuition Fee Income ■5,000.

SCREENSHOT PLACEHOLDER

Finance → Receive Payment

10 Fee Follow-up and Outstanding Fees

Feezo can track student fees as Paid, Partially Paid or Outstanding. The Fees Report can be used to review student-wise and class-wise collection and outstanding amounts.

Step-by-step: check a student’s fee position

1.	**Open the Fees Report / fee follow-up area.**
2.	Select the relevant academic period if required.
3.	Review the student’s fee lines.
4.	Identify Paid, Partially Paid and Outstanding amounts.
5.	Check the total outstanding amount.
6.	Use class-wise or student-wise views to identify collection gaps.

Questions this report should answer

■	**Who has paid?**
■	Whose fee is pending?
■	How much is pending?
■	How much has each class collected?
■	How much has each student paid?

11 Receipts

A receipt is the payment record generated after a Receive Payment transaction is saved. The supplied specification states that receipts can be printed, downloaded as PDF and given to the parent or student. Receipt numbers can be generated automatically.

Step-by-step

1.	**Complete and save the Receive Payment transaction.**
2.	Open the generated Receipt.
3.	Check student, fee, amount and payment details.
4.	Print the receipt if a physical copy is required.
5.	Download as PDF if a digital copy is required.
6.	Provide the receipt to the parent / student.

Control
Always verify the receipt details before handing it to the parent or student.

SCREENSHOT PLACEHOLDER

Receipt preview

12 Make Payment

Make Payment is used when money leaves the school. The source identifies Salary, Expense and Vendor Payment as the main uses.

Step-by-step

1.	**Go to Finance → Make Payment.**
2.	Select the Payee Type.
3.	Enter the Amount.
4.	Select the Payment Mode.
5.	Enter the Narration.
6.	Select the appropriate Expense Ledger where required.
7.	Review the entry.
8.	Save the payment.

Before saving, verify

■	**Correct payee type**
■	Correct amount
■	Correct Cash / Bank mode
■	Correct expense ledger
■	Useful narration

SCREENSHOT PLACEHOLDER

Finance → Make Payment

13 Salary Payment

Salary payments are recorded through Make Payment → Salary. The supplied workflow requires Staff, Month, Amount and Payment Mode.

Step-by-step

1.	**Open Finance → Make Payment.**
2.	Choose Salary.
3.	Select the Staff member.
4.	Select the salary Month.
5.	Enter the Amount.
6.	Select the Payment Mode.
7.	Review the details.
8.	Save the salary payment.

After saving, the salary payment is also available in Staff Salary History.

Accounting effect
A ■30,000 salary payment is represented as Debit → Salary Expense ■30,000 and Credit → Cash / Bank ■30,000.

14 Other Expense

Other Expense is used for ordinary school expenses such as electricity, rent, stationery, maintenance or internet.

Example
Electricity Bill

Field	Example
Transaction type	Other Expense
Expense Ledger	Electricity Expense
Amount	■10,000
Payment Mode	Bank
Narration	September Electricity Bill

Step-by-step

1.	**Go to Finance → Make Payment.**
2.	Choose Other Expense.
3.	Select Electricity Expense.
4.	Enter ■10,000.
5.	Select Bank as the payment mode.
6.	Enter a clear narration such as September Electricity Bill.
7.	Review and save.

Accounting effect
Debit → Electricity Expense ■10,000; Credit → Cash ■10,000 when the payment is made in cash.

15 Vendor Payment

Use Make Payment → Vendor when paying a supplier or service provider. Examples include stationery suppliers, transport vendors, maintenance companies and computer suppliers.

Step-by-step

1.	**Open Finance → Make Payment.**
2.	Select Vendor.
3.	Identify the vendor / payee.
4.	Enter the amount.
5.	Select the payment mode.
6.	Enter a clear narration.
7.	Select the appropriate account / expense ledger when required.
8.	Review the transaction.
9.	Save.

16 Queued and Cleared Payments

Payment status is important in Make Payment.

Status	Meaning
Queued	The payment has been recorded / approved in the system, but the money has not yet actually been paid.
Cleared	The money has actually been paid from Cash / Bank.

After the actual payment is made, the transaction should be marked Cleared.

Control
Do not mark a payment Cleared before the actual Cash / Bank payment has occurred.

17 Day Book

Day Book is the daily record of cash activities. It shows money received, money paid and cash transactions in date/time order.

Daily procedure

1.	**Open Day Book.**
2.	Select Today's Transactions.
3.	Review all money received.
4.	Review all money paid.
5.	Check the cash balance.
6.	Compare the system balance with the actual cash held by the cashier.
7.	Investigate any difference.

Purpose
The Day Book is a daily control point for Cash activity.

SCREENSHOT PLACEHOLDER

Day Book transaction list

18 Bank Reconciliation

Bank Reconciliation is used to match Feezo bank / UPI transactions with the bank statement. The supplied procedure aims to make the difference zero.

Step-by-step

1.	**Go to Finance → Bank Reconciliation.**
2.	Enter the bank statement total amount.
3.	Review the Feezo bank transactions.
4.	Match the transactions against the statement.
5.	Select all matching transactions.
6.	Check the Difference.
7.	Investigate unmatched or incorrect entries.
8.	Continue until the Difference is 0.

Final control: Software Bank Total should equal Bank Statement Total.

SCREENSHOT PLACEHOLDER

Bank Reconciliation

19 Analytics

Analytics provides a summary of Income, Expenses, Income Categories, Outflow Categories and Net Movement.

How to investigate an unexpected amount

1.	**Identify the amount or category that looks incorrect.**
2.	Do not edit the Analytics result directly.
3.	Open the source transaction area.
4.	Check Receive Payment entries for income.
5.	Check Make Payment entries for expenses / outflow.
6.	Correct the source transaction if the system provides an appropriate correction process.
7.	Return to Analytics and review the result again.

Principle
Analytics is a summary. The source transaction should be checked first.

SCREENSHOT PLACEHOLDER

Analytics summary

20 Ledger

A Ledger is the detailed statement of an individual account. It can show Opening, Debit, Credit, Transactions and Closing.

Step-by-step

1.	**Go to Finance → Ledger.**
2.	Select the required Ledger.
3.	Review the Opening balance.
4.	Review Debit transactions.
5.	Review Credit transactions.
6.	Review individual transaction details.
7.	Review the Closing balance.
8.	Use the transaction details to investigate unusual balances.

Example
For Electricity Expense Ledger, review all electricity-related transactions and the resulting balance.

SCREENSHOT PLACEHOLDER

Ledger detail view

21 Journal

Journal is the main record of double-entry accounting transactions. Every transaction should have equal Debit and Credit totals.

Core rule

TOTAL DEBIT = TOTAL CREDIT

Example

Account	Debit	Credit
Electricity Expense	■10,000	
Cash		■10,000
Total	■10,000	■10,000

Control
If Debit and Credit are not equal, investigate the accounting entry.

22 Manual Journal

Manual Journal is used when a manual double-entry accounting adjustment or transaction needs to be created. The supplied specification states that a journal should contain at least two accounting lines.

Step-by-step

1.	**Open Manual Journal.**
2.	Enter the required journal information.
3.	Add the first accounting line.
4.	Select the Account.
5.	Enter the Debit or Credit amount.
6.	Add the second accounting line.
7.	Select the Account.
8.	Enter the opposite Debit or Credit amount.
9.	Check that Total Debit equals Total Credit.
10.	Save the Journal.

Minimum requirement
A journal must have at least two accounting lines according to the supplied instructions.

23 Opening Balance

Opening Journal is used when bringing existing accounts into the software and entering balances that already existed before the system's accounting activity begins.

Example

Account	Opening Balance
Cash	■50,000
Bank	■2,00,000

Step-by-step

1.	**Identify the balances that exist before starting the new accounting period in Feezo.**
2.	Prepare the opening figures.
3.	Open the Opening Journal.
4.	Enter the appropriate Balance Sheet accounts.
5.	Check that the opening journal balances correctly.
6.	Save the opening journal.

Important
The supplied guidance states that Opening Journal should normally use Balance Sheet accounts.

24 Trial Balance

Trial Balance checks the Debit and Credit balances of accounts. The fundamental rule is Total Debit = Total Credit.

Step-by-step

1.	**Open Trial Balance.**
2.	Select the required period if applicable.
3.	Review total Debit.
4.	Review total Credit.
5.	Confirm that Debit equals Credit.
6.	If they are not equal, identify the affected account or transaction.
7.	Open the relevant Ledger and inspect the transactions.
8.	Correct the source issue using the appropriate accounting process.

Rule
An unequal Trial Balance indicates that an accounting entry requires investigation.

SCREENSHOT PLACEHOLDER

Trial Balance

25 Profit & Loss

Profit & Loss shows the relationship between Income and Expenses for a period. The supplied example is Income ■10,00,000 less Expense ■7,00,000 = Net Profit ■3,00,000.

Step-by-step

1.	**Open Profit & Loss.**
2.	Select the required reporting period.
3.	Review Fee Income.
4.	Review Other Income.
5.	Review Salary Expense.
6.	Review Electricity, Rent, Maintenance and other expenses.
7.	Compare total Income with total Expenses.
8.	Review the resulting profit / loss.

Formula
Net Profit / Loss = Income − Expenses

SCREENSHOT PLACEHOLDER

Profit & Loss report

26 Balance Sheet

Balance Sheet presents the school's financial position. The supplied accounting equation is Assets = Liabilities + Equity.

Assets

■	**Cash**
■	Bank
■	Furniture
■	Equipment
■	Other Assets

Liabilities

■	**Salary Payable**
■	Vendor Payable
■	Other Liabilities

Equity

■	**Capital**
■	Retained Earnings

Step-by-step

1.	**Open Balance Sheet.**
2.	Select the required reporting period.
3.	Review Assets.
4.	Review Liabilities.
5.	Review Equity.
6.	Check that the accounting equation is represented correctly.

Formula
Assets = Liabilities + Equity

SCREENSHOT PLACEHOLDER

Balance Sheet report

27 Fee Break

Fee Break is used when a particular fee does not apply to a student for a specific period. For example, if a student does not use transport for one month, the Transport Fee can be broken for that month.

Step-by-step

1.	**Identify the student.**
2.	Identify the fee period that should not be charged.
3.	Use the Fee Break function for the applicable fee.
4.	Select the relevant period / fee line.
5.	Save the Fee Break.
6.	Verify that the fee is not collected for that broken period.

Result
A fee-break period should not be collected during Receive Payment.

SCREENSHOT PLACEHOLDER

Fee Break workflow

28 Finance Reports

Report	Use it to
Fees Report	Review student-wise / class-wise fee collection and outstanding
Salary Report	Review staff salary payments
Day Book	Review daily cash activity
Bank Reconciliation	Match software transactions with bank statement
Ledger	Review detailed account activity
Trial Balance	Check Debit / Credit equality
Profit & Loss	Review Income versus Expenses
Balance Sheet	Review Assets, Liabilities and Equity

These reports form the main reporting layer described in the supplied Finance module specification.

29 Daily Operating Procedure

29.1 Start of day

1.	**Check Campus / Branch.**
2.	Check Academic Year.
3.	Review previous pending transactions.

29.2 During fee collection

1.	**Select the Student.**
2.	Check the fee.
3.	Verify the amount.
4.	Select the payment mode.
5.	Save the payment.
6.	Generate the receipt.

29.3 When an expense occurs

1.	**Select the correct Expense Ledger.**
2.	Enter the amount.
3.	Select the payment mode.
4.	Enter narration.
5.	Save the payment.

29.4 End of day

1.	**Open Day Book.**
2.	Review all transactions.
3.	Check the Cash balance.
4.	Compare with actual cashier cash.
5.	Review Bank / UPI transactions.

The supplied daily checklist follows this sequence and should be used as the basic daily operating discipline.

30 Monthly Closing Procedure

1.	**Open Fees Report and review outstanding fees.**
2.	Open Salary Report and verify staff salary payments.
3.	Review the month's Day Book.
4.	Complete Bank Reconciliation.
5.	Review important Income and Expense Ledgers.
6.	Run Trial Balance and confirm Debit = Credit.
7.	Review Profit & Loss.
8.	Review Balance Sheet.

This monthly sequence is directly aligned with the supplied month-end checklist.

31 Complete Transaction Examples

31.1 Student Tuition Fee – ■5,000

Step	Action	Expected result
1	Open Receive Payment	Payment entry screen opens
2	Select Class and Student	Correct student identified
3	Select Tuition Fee	Correct fee line selected
4	Enter / verify ■5,000	Correct amount
5	Select Cash or Bank / UPI	Correct payment mode
6	Enter Paid Date and Time	Transaction date/time recorded
7	Save	Payment recorded
8	Generate Receipt	Receipt available
9	Check fee status	Outstanding amount reduces

Accounting
Debit → Cash / Bank ■5,000; Credit → Tuition Fee Income ■5,000.

31.2 Electricity Expense – ■10,000

Step	Action	Expected result
1	Open Make Payment	Payment screen opens
2	Select Other Expense	Expense workflow selected
3	Select Electricity Expense	Correct ledger
4	Enter ■10,000	Correct amount
5	Select Cash / Bank	Correct payment mode
6	Enter narration	Clear transaction description
7	Save	Expense recorded

Accounting for a cash payment: Debit → Electricity Expense ■10,000; Credit → Cash ■10,000.

31.3 Staff Salary – ■30,000

Step	Action	Expected result
1	Open Make Payment → Salary	Salary workflow selected
2	Select staff	Correct employee
3	Select month	Correct salary period
4	Enter ■30,000	Correct salary amount
5	Select payment mode	Correct Cash / Bank mode

Step	Action	Expected result
6	Save	Salary payment recorded
7	Review Salary History	Payment appears in staff history

Accounting
Debit → Salary Expense ■30,000; Credit → Cash / Bank ■30,000.

32 Common Errors and Controls

Avoid	Why it matters	Control
Wrong Campus	Transaction can belong to the wrong branch	Check header before entry
Wrong Academic Year	Fee / report data can be placed in the wrong year	Check year before entry
Wrong Expense Ledger	Reports can classify expenses incorrectly	Verify Ledger and Account Group
Duplicate payment	Collection / expense can be overstated	Search/check existing transaction before re-entry
Cash recorded as Bank	Cash and bank balances become incorrect	Verify actual payment mode
Bank recorded as Cash	Cash balance becomes incorrect	Verify actual payment mode
Premature Cleared status	Payment status becomes inaccurate	Mark Cleared only after actual payment
Wrong Ledger Group	P&L / Balance Sheet can be affected	Check Income / Expense / Asset / Liability group
Unverified receipt	Parent/student may receive incorrect evidence	Review before print/PDF
Uninvestigated reconciliation difference	Bank balance remains unreliable	Match transactions and investigate difference

The source specifically warns against wrong Campus, wrong Academic Year, wrong Ledger, duplicate payment, incorrect Cash/Bank classification, premature Cleared status and incorrect Account Group selection.

33 Accounts Department Workflow

33.1 Initial setup

Campus / Branch → Academic Year → Fee Categories → Account / Ledger Setup

33.2 Daily operations

Receive Payment → Receipt → Make Payment → Salary / Expense → Day Book

33.3 Monthly operations

Fees Report → Salary Report → Bank Reconciliation → Ledger Checking → Trial Balance → Profit & Loss → Balance Sheet

This is the complete workflow described in the supplied source.

34 Quick Reference

Need to do	Use this module
Money comes into the school	Receive Payment
Generate payment evidence	Receipt
Check student fee status	Fees / Fees Report
Money goes out of the school	Make Payment
Pay staff salary	Make Payment → Salary
Record normal expense	Make Payment → Other Expense
Pay supplier	Make Payment → Vendor
Review daily cash transactions	Day Book
Match bank statement	Bank Reconciliation
Review one account	Ledger
Review accounting entries	Journal
Create a manual double-entry	Manual Journal
Enter existing opening balances	Opening Journal
Check Debit = Credit	Trial Balance
Review Income – Expenses	Profit & Loss
Review Assets / Liabilities / Equity	Balance Sheet
Review summarized Income / Expense movement	Analytics
Exclude an applicable fee for a period	Fee Break

Easy way to remember

Situation	Remember
Money comes in	Receive Payment
Money goes out	Make Payment
Account details	Ledger
All accounting entries	Journal
Debit = Credit check	Trial Balance
Income – Expense	Profit & Loss
Assets – Liabilities – Equity	Balance Sheet
Daily cash	Day Book
Bank statement matching	Bank Reconciliation
Student fee checking	Fees Report

Situation	Remember
Staff salary checking	Salary Report
Income / Expense summary	Analytics

Final Operating Principle

The most important operational discipline is to complete the setup correctly first, then record daily transactions accurately. The supplied specification emphasizes that Accounts staff should first set Campus → Academic Year → Fee Categories → Ledgers correctly and then perform daily Receive Payment / Make Payment entries accurately.

Recommended daily habit: Before saving any financial transaction, verify the branch, academic year, person/student/vendor, amount, payment mode, relevant ledger, date/time and narration. At the end of the day, use Day Book and the actual Cash / Bank position to identify differences.
